

Energy from Waste & Waste to Energy

20th & 21st July 2017

Where are EfW & WtE going?

- What are the challenges?
- What research is needed?
- What are the opportunities?
- What development is needed?

A free 2-day workshop is taking place at Aston University, Birmingham

Presentations and active workshops will cover:

- Policies
- Waste quantities, composition, trends
- Waste preparation and pretreatment
- Conversion technologies
- Products and upgrades: heat, power, fuel
- Extracting value from waste
- Circular economy concepts
- Environmental impacts and sustainability

The workshop is ideal for:

- Waste management companies
- Local authorities
- Policy setting bodies
- Technology development companies
- Research organisations
- Project development companies
- Consultants

TO APPLY FOR A FREE PLACE, PLEASE COMPLETE & RETURN THE FORM BELOW:

Overnight accommodation and meals will be provided. There are 50 places available. Multiple applications per organisation are acceptable, capacity allowing. Delegates who book a place but do not attend will be invoiced £250. Submission of a registration form is acceptance of these terms.

REPLY FORM PLEASE RETURN TO EMMA WYLDE (e.wylde@aston.ac.uk)
